IMPORTANT REACH INFORMATION

Dear Customer,

You will be concerned that all of the chemicals supplied to you will remain on the EU market after 1st June 2008. We receive many enquiries for information which are both extensive and variable. The flow of information between supplier and downstream user is to be the subject of official guidance which is not yet finalised.

The following statements summarise our activities:

Lake Chemicals and Minerals Ltd. intends to ensure that every substance which it supplies, on its own or in a preparation, remains available to you.

Lake Chemicals and Minerals Ltd. has appointed PCC Europe Ltd. to co-ordinate its activities to achieve compliance with the REACH Regulation.

Many of the materials supplied by Lake are imported from outside the European Union. Where substances are not registered by the importer, PCC Europe as 'Only Representative' will undertake the registration on behalf of Lake Chemicals & Minerals Ltd.

PCC Europe will be pre-registering all the substances involved from June 1st 2008.

REACH requires the tracking of the entire life cycle of chemicals throughout the supply chain. Information about the identified uses of each substance will be required by us for the purposes of registration. This includes the actual uses of the products Lake supply and, if you do not change the chemical identity of the substance, the uses of your customers. This information will allow us to include your uses as Downstream User information and in the Safety Data Sheets for the product.

The regulatory authorities are developing communication guidelines for the preservation of confidentiality of information. PCC Europe will adhere to these guidelines and will ask you for this usage information at a later date.

Yours sincerely,

Steven Cartlidge
Managing Director

LAKE CHEMICALS & MINERALS LTD.

Imex Business Centre, Office 42, Oxleasow Road, Redditch, Worcestershire, B98 0RE
